#### New Shingle Roof Performance Requirements

Category	Certified To Achieve	GoNano NuRoof Revive™ & GoNano NuRoof Fortify™ (Installed on 15 yr. old roof)	Typical Shingle (At time of installation)
Impact Resistance	UL 2218	EXCEED (Class 3+)	PASS (Class 2)
Resist High Wind	ASTM D3161	EXCEED (110 mph)	PASS (60 mph)
Moisture Barrier	Scientifically Proven	EXCEED	Pass
Hydrophobic	Scientifically Proven	EXCEED	No
Moss & Algae Purging	Scientifically Proven	EXCEED	No
Resists Uplift Pressure	ASTM D7158	PASS	PASS
Fire Resistance	ASTM E108	PASS	PASS
UV Resistance	ASTM-D4329	PASS	PASS
Tear Strength	ASTM D3462	PASS	PASS
Wind Uplift Resistance	ASTM-D7158	PASS	PASS

*This installation is a spray on top of an existing roof system which at the time of install achieved all code requirements. This treatment penetrates into the aged shingle resulting in an embedded protection system. This application restores the shingle performance characteristics to equal or better. In some cases, exceeding the requirements from when it was originally manufactured.*

### Extraordinary Results

- ❑ **Trusted Performance (2025)** - Over 50,000 homeowners benefiting from superior property protection with this patented molecular nanotechnology.
- ❑ **Save Thousands** - Typically 75% lower cost versus a roof tear off and replacement. That is because GoNano NuRoof Fortify™ & GoNano NuRoof Revive™ act like a protective roof shield when applied to your existing roof system. Both enhancing and strengthening the asphalt shingles from the inside (below the surface).
- ❑ **Increased Value & Faster Home Resale** - Better appearance and superior defense, combined with an extraordinary product defect limited warranty that is transferable to the new homeowner.
- ❑ **Prevents Ugly Roof Discoloration & Growth** - Keeps out the moisture required for mold and algae growth. Any existing discoloration will likely be eliminated within 15 weeks and the roof's original color will be restored.

### Special Note

Your shingles also now has these performance advantages

- A. **Reduce Granule Loss** - significantly improves granule adhesion – PROTECTS ASPHALT
- B. **Reduce Algae & Moss** - overtime, literally suffocates algae & moss – MORE ATTRACTIVE
- C. **Impact Resistance** - helps prevent most insurance claims due to hail storms – BETTER THAN NEW

Please Select Product Used

The graphic for NuRoof Fortify features a dark blue background with a white house silhouette. At the top left is the 'gonano' logo. The main title 'NuRoof' is in large white letters, with 'Fortify' in blue below it. A white roofline with three arrows pointing up is positioned above the text. Inside the house silhouette, an orange-to-red gradient box contains the text 'Extreme Weather Protection'. Below this, the text 'Boosts Newer Shingle Performance' is written in white. At the bottom, an orange rounded rectangle contains the slogan 'Never Tear Off Your Roof Again' in white.

The graphic for NuRoof Revive features a dark blue background with a white house silhouette. At the top left is the 'gonano' logo. The main title 'NuRoof' is in large white letters, with 'Revive' in orange below it. A white roofline with three arrows pointing up is positioned above the text. Inside the house silhouette, an orange-to-red gradient box contains the text 'Extreme Weather Protection'. Below this, the text 'Completely Refurbish Older Shingles' is written in white. At the bottom, an orange rounded rectangle contains the slogan 'Make Shingles Better Than New' in white.

**Saves Money - Environment Friendly**

Peace of Mind - Great Warranty  
No Ugly Staining - Prevents Algae  
Superior Protection - Impact Resistant
